About Us

ONLC Training Centers is a leader in the training industry.

We've been building our reputation as a high-quality, trustworthy training partner since 1983. Those efforts have been acknowledged by our customers—we've grown to be one of the largest training companies, delivering instruction at over 20 locations throughout the Northeast.

Over the past 20 years we've trained over 250,000 students. In addition, we have been recognized by Microsoft as one of the fastest growing training companies in the United States.

While our growth and training volumes may be impressive, our strongest commitment is to quality. On average, a class has fewer than 8 students and our customer service staff is knowledgeable and responsive. In addition, all of our classes include a money-back guarantee.

The enclosed poster shows a partial list of our public courses. We are also able to design customized training events that meet the specific learning objectives for your team. We hope that you'll consider us for your upcoming IT or business training needs.

OUR CLASSROOM LOCATIONS

Mid-Atlantic Region

- DE** Wilmington
- DC** Washington D.C.
- NJ** Hasbrouck Heights, Mt. Laurel, Princeton
- PA** Conshohocken, Philadelphia, Pittsburgh, Willow Grove
- VA** Falls Church

Northeast Region

- CT** E. Windsor, Wallingford
- MA** Boston, Hanover, Holyoke, Wakefield, Waltham
- NH** Londonderry
- NY** Albany, Manhattan
- RI** Lincoln
- VT** Burlington

or Via RCI from your home or office PC. Call for details.

Training News

Exclusive New Courses

We offer many courses that can not be found at other training companies, including:

- **Voice over IP**—We now offer some of the most popular VoIP courses: Cisco IP Telephony; Unified Communications System Engineer; and Cisco Voice over IP. 
- **Active Directory Support**—this course takes content from several Microsoft authorized courses and distills the most important Active Directory learning modules into a 5-day format for support professionals.
- **Citrix FastTrack**—This authorized class provides 7 days worth of training in just 5 days, and as a bonus, comes with free e-learning courses.
- **Visual Studio Team System Deep Dive**—learn about the role based features of this new product.
- **VMware Infrastructure 3**—This course covers server consolidation with VMware virtualization. 

For more information about these and other exclusive classes at ONLC Training Centers please visit:

www.onlc.com/Exclusives

Certification News

New Generation Certifications

Microsoft has designed "New Generation" certifications for its latest round of product releases. New *Specialist* and *Professional* level certifications will be available for SQL 2005, Vista, Exchange, Office and other products. To learn more join us for a **FREE New Generation Certification seminar on January 24, 2007**. For more information:

www.onlc.com/NewGeneration

Certified Wireless Classes

Now you can receive training that will lead to wireless administration and wireless security certification at any of our locations. ONLC Training Centers recently became a Certified Wireless Networking Professional (CWNP) Authorized Learning Center. In fact, we have more certified locations than any other training provider. For more information:

www.onlc.com/WirelessPro

Business Analyst & ITIL

IT organizations have been challenged to better reflect business priorities in their dealings and processes. Two Business Process areas that are getting a lot of attention these days are ITIL (IT Infrastructure Library) and the Business Analyst job role. We offer classes that will help you prepare for ITIL and Business Analyst Certification. See our schedule on the next page or for more information:

www.onlc.com/Process

Awards & Improvements

Bigger & Better Facilities

We are in the middle of a massive upgrade of our facilities. From August 2006 to January 2007 we will have relocated and/or expanded 6 facilities: Londonderry, NH; Lincoln, RI; East Windsor, CT; Conshohocken, PA; Princeton, NJ; and Philadelphia, PA. By early next year we will have added over 20 new classrooms to our network of training locations—helping us provide you with more training where you want it! For more information...

www.onlc.com/Expanding

RCI Audio Improvements

We are continually improving our Remote Classroom Instruction (RCI) technology. Over the past year as our RCI class sizes have grown, we've been getting comments that remote students weren't able to hear comments from students in the instructor's classroom. This is because there was only a single microphone in the front of the room. By November 2006 we will have completed a significant rollout of over \$10,000 in microphones in our large classrooms.

Citrix Training Awarded

ONLC has been recognized as the top Citrix Authorized Learning Center (CALC) in North America! In October we received the "CALC of the Quarter" award for our innovative Internet-based training delivery using RCI technology and for our high volume of authorized Citrix classes. Learn more at:

www.onlc.com/CitrixAward

MINITAB: Manufacturing Track (4 classes; can be taken separately)	4 days	11/27-30	
---	--------	----------	--

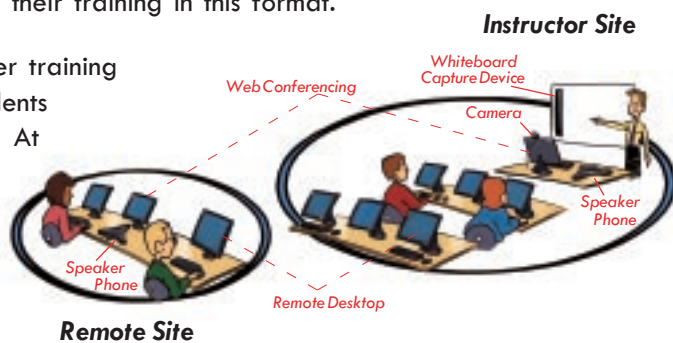

Classes **Run** at **onlc** Training Centers

Lowest Class Cancellation Rate in the Industry

Traditional Classroom Training. We schedule our classes at more than 20 locations throughout the Northeast USA. Typically, when there are four or more students attending class at the same site, we assign an instructor to that site to deliver the class. On any given day, we could have multiple instructors teaching the same class in different locations. Approximately 75% of our students receive their training in this format.

Remote Classroom Instruction (RCI). When other training companies have classes with low enrollments, students receive a cancellation notice without alternatives. At ONLC if your site has low enrollments, we give you two options. You can travel to the site where the instructor will be teaching the class in a traditional format, or you can attend the class “remotely” using our RCI technology.

If you elect to attend the class via RCI, you choose the location for the class. You can either go to our local training site or you can attend from your computer at your home or office. In all cases, the class dates and times remain the same so there is no disruption to your personal schedule.

Reduced Cancellation Rates. By placing instructors in locations with high enrollments and offering you the option to join these sessions remotely, we’ve reduced our class cancellation rates to the lowest in the training industry. **At ONLC there is over 90% chance that your class will run at the date and location that you selected—without a cancellation.** We’ve trained thousands of students via RCI technology. Learn more about RCI and how it can provide you with convenient access to high-quality, instructor-led training by visiting www.onlc.com/MoreRCI
